ABOUT ME

Detail-oriented QA Tester and Cybersecurity enthusiast with hands-on experience in application security analysis, vulnerability assessment, and functional testing. Currently strengthening practical network analysis skills using Wireshark. Strong understanding of web technologies and secure development practices, with proven ability to identify bugs, security gaps, and usability flaws. Seeking opportunities in QA Testing, Cybersecurity, or Penetration Testing.

WORK EXPERIENCE

NEWS SPEAKS -INTERNSHIP

Website Manager

FEB-2026

- Website Redesign: Spearheaded a comprehensive redesign of the company's WordPress-based news portal to improve user interface (UI) and mobile responsiveness.
- Content Operations: Managed daily digital publishing workflows, ensuring timely and accurate uploading of local news articles and multimedia content.
- System Optimization: Configured WordPress themes and plugins to enhance site performance and security protocols.
- Digital Asset Management: Curated and edited images and layouts to maintain a professional aesthetic consistent with the brand's print identity.

PROJECT - AUTOMATED ATHLETE PERFORMANCE TRACKING SYSTEM

UI/UX Designer | Hand Gesture AI Model Lead | QA Tester

SEP-2025

- Designed and optimized UI/UX architecture for performance monitoring dashboard.
- Led integration coordination for Hand Gesture AI Model within user interface workflows.
- Conducted usability testing and functional validation to ensure smooth interaction.
- Identified and resolved interface-level bugs to improve responsiveness and accuracy.

FREELANCE - ZOBSAI

QA Tester

DEC-2025

- Performed functional and exploratory testing to ensure software stability and performance.
- Identified UI inconsistencies, logical bugs, and edge-case failures before production release.
- Collaborated with developers to validate fixes and improve software reliability.
